Professional Summary

DevOps Engineer with hands-on experience in AWS cloud infrastructure, CI/CD automation, Infrastructure as Code, and containerized deployments. Skilled in Terraform, Jenkins, Maven, Nexus, SonarQube, Docker, Amazon EKS, Ansible, Prometheus, Grafana, and CloudWatch. Experienced in automating infrastructure and software delivery, managing Linux environments, and troubleshooting cloud and deployment issues.

Technical Skills

Cloud Platforms: AWS (EC2, VPC, IAM, S3, EKS, RDS, Route 53, CloudFront, SNS, CloudWatch, Auto Scaling), Azure, OpenStack

DevOps & CI/CD: Jenkins, GitHub Actions, GitLab CI/CD, Maven, Nexus, SonarQube, Argo CD, Git, GitHub, GitLab, GitOps

Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Helm

Infrastructure as Code: Terraform, Ansible, Infrastructure as Code, Configuration Management

Monitoring & Observability: Prometheus, Grafana, CloudWatch, ELK Stack, Alerting, Dashboards

Networking & Security: VPC, IAM, Security Groups, Firewalls, Load Balancers, Application Load Balancer (ALB), NGINX, HAProxy, DNS, Networking, Virtualization

Scripting & Operating Systems: Python, Bash, Shell Scripting, Groovy, YAML, Linux, Windows

Programming Languages: Python, C, C++, JavaScript, TypeScript

Experience

DevOps Engineer

May 2025 – Present

EXNER TECHNOLOGIES PRIVATE LIMITED

- Built CI/CD pipelines with **Jenkins, Maven, Nexus, and SonarQube**, automating build, testing, quality checks, and deployments across development, staging, and production.
- Containerized applications with **Docker** and deployed them on **Amazon EKS**, using Kubernetes Deployments, Services, ConfigMaps, and rolling updates for reliable releases.
- Developed reusable **Terraform modules** to provision AWS infrastructure consistently, reducing manual configuration across cloud environments.
- Automated server provisioning and application configuration with **Ansible and Bash**, improving deployment consistency and repeatability.
- Implemented **Prometheus, Grafana, and AWS CloudWatch** monitoring with dashboards and alerts to detect infrastructure issues and support troubleshooting.
- Improved application reliability using **ALB, Auto Scaling, custom AMIs, and EBS snapshots**; investigated deployment failures and performed **Root Cause Analysis (RCA)**.

Full Stack Developer Intern

Jan 2025 – Apr 2025

AbsolveIT

- Supported application development and deployment in **Linux-based OpenStack cloud environments**, contributing to application delivery and operational workflows.
- Worked with **Git, CI/CD, automated testing, and cloud deployments** throughout the software development lifecycle.
- Developed and debugged backend services and REST APIs using **Python/Flask**, with SQL/NoSQL database integration.
- Troubleshoot application and deployment issues across development and cloud environments.

DevOps & Cloud Projects

Cloud Infrastructure Deployment & Monitoring

github.com/NSO-A.2

- **Technologies:** Linux, OpenStack, HAProxy, NGINX, Prometheus, Grafana, Apache Benchmarking
- Deployed and managed cloud infrastructure using **OpenStack**, including networks, routers, and compute resources.

- Configured **HAProxy** and **NGINX** load balancing and implemented Prometheus/Grafana monitoring dashboards.
- Performed load testing with **Apache Benchmarking** and automated scaling to improve application availability and resource utilization.

Hourlog – CI/CD & Cloud Deployment

github.com/Hourlog

- **Technologies:** Next.js, React, TypeScript, Supabase, GitHub Actions, CI/CD, Linux, NGINX, Vercel
- Developed and deployed a production-oriented time-tracking application with **PostgreSQL** and role-based access control.
- Implemented **GitHub Actions CI/CD** for automated application build, validation, and deployment.
- Deployed the application on a **Linux server using NGINX** as a reverse proxy and managed environment variables and secrets.
- Implemented operational checks and troubleshooting workflows to improve deployment reliability.

Education

Blekinge Institute of Technology (BTH)

Jan 2023 – Jan 2025

Master's in Telecommunication Systems

Karlskrona, Sweden

- **Relevant Coursework:** Cloud Computing, Network Virtualization, Automation with Ansible, MIMO Systems, 5G Network Optimization, Machine Learning

Jawaharlal Nehru Technological University Hyderabad (JNTUH)

Aug 2019 – Jan 2023

Bachelor's in Electronics and Communication Engineering

Hyderabad, India

- **Relevant Coursework:** Cloud Computing, Python Programming, Embedded Systems, Java, VLSI Design
